There will be positive interaction on new format of AQAR, on SSR preparation with special focus on Best Practices in Higher Education- A Quality Enhancement Initiative.

THEMES AND OBJECTIVES

Those practices which add commendable value to an institution and its various stakeholders are indeed its best practices. These are predictors of an institution's success. For instance, widespread acceptance by groups, social systems and individuals is a must for these to be put to practice. However, multiple variables must be kept in mind while identifying the practices, namely: perspectives, contexts, interests and values, besides the limited knowledge. These are also contingent, context dependent and defy generic description. A pre-dominantly 'fitness for purpose' judgement and one cannot write an ideal typification of 'best practices to all contexts.' The input factors, the process factors and output factors should be taken into account in identifying the criteria of best practices. The criteria of economy, efficiency and effectiveness may also be helpful in identifying these. The practitioners may be asked to describe their best practices and the criteria they have been applied in in their identification, justifying their choices logically. The following four themes require an in depth discussion:

- Identification of Best Practices
- Sustainability of Best Practices
- Dissemination of Best Practices
- Adaptation of Best Practices
